SKILLS

Languages

- Dart

Framework

- Flutter

State Management

- Bloc
- GetX

Backend & Database

- Firebase (Authentication, Firestore)
- MongoDB

APIs

- REST APIs

Integrations & Services

- Google Maps & Location
- Push Notifications (FCM)
- Audio / Video Calling
- Cloudinary (Image & Video Storage)

Tools & Others

- Git & GitHub
- VS Code
- Problem Solving
- Clean Architecture

EDUCATION

2022 – 2026 (Expected)

Bachelor of Computer Science

The Islamia University of Bahawalpur,
Bahawalpur

Note:

Started learning Flutter in May 2025.
Around 1 year and 3 months of
hands-on development experience.

PROFESSIONAL SUMMARY

Passionate and self-motivated Flutter Developer with 1+ year of hands-on experience in building high-quality, user-friendly cross-platform mobile applications. Skilled in Flutter, Dart, state management (Bloc, GetX), Firebase, REST APIs, and modern mobile app development practices. Eager to learn, grow, and contribute to challenging projects.

EXPERIENCE

Independent Flutter Developer

May 2025 – Present

(Self-Learning & Personal Projects)

- Self-taught Flutter developer with strong dedication to learning and building real-world applications.
- Developed multiple mobile apps from scratch and improved them through continuous learning and feedback.
- Implemented clean architecture, efficient state management, and REST API integration.
- Integrated Firebase services and third-party APIs to deliver real-time and scalable solutions.
- Focused on writing clean, optimized, and maintainable code.

PROJECTS

1. QR Scanner & Generator App

Developed a QR code scanner and generator app.

Tech Stack: Flutter, Dart, Bloc, Mobile Scanner, Firebase

2. XCheing Trading & Marketplace App

Built a trading and marketplace app without payment integration or external APIs. Backend managed with Firebase.

Tech Stack: Flutter, Dart, GetX, Firebase (Authentication, Firestore)

3. Hamari Society – Society Management System

Developed a society management app using REST APIs for all operations.

Tech Stack: Flutter, Dart, GetX, REST APIs

4. Bus Tracking System (Admin, Conductor & Passenger Apps)

Built a complete bus tracking system with live location, route management, and real-time updates.

Tech Stack: Flutter, Dart, Bloc, Firebase, Google Maps, REST APIs

5. Chttrix – Chat Application

Developed a WhatsApp-like chat application with one-to-one messaging, audio/video calls, voice messages, real-time notifications, user profile, and authentication.

Tech Stack: Flutter, Dart, GetX, Firebase, REST APIs, Cloudinary (Image & Video Storage), Agora (Audio/Video Calling), FCM

TECHNOLOGIES & TOOLS

Flutter • Dart • Bloc • GetX • Firebase • REST APIs • MongoDB
Cloudinary • Google Maps • Agora • FCM • Git & GitHub • VS Code

ACHIEVEMENTS & LEARNING

- Built and deployed multiple mobile applications from idea to production.
- Continuously improving skills in Flutter, clean architecture, and backend integration.
- Focused on delivering smooth user experiences and performance optimization.
